

SHIVAM KHARAT

shivamkharat21@gmail.com | +91-8605867086 | [LINKEDIN](#) | [GITHUB](#) | Location: Pune 411061

Software Engineer with 1.8+ years of experience building Python backend systems, web scraping and automation solutions, REST APIs, and AI-powered applications. Skilled in developing scalable data collection pipelines using **Scrapy and Selenium**, **Linux-based automation**, **MongoDB and PostgreSQL** database design, and **integrating LLMs** into enterprise workflows for intelligent automation and reporting.

Technical Skills

Programming Languages : Python, SQL, Shell Scripting

Software Engineering: Modular Code Design, Data Structures, FAST API, REST APIs, Error Handling, Logging, Scheduling

Databases : MongoDB, PostgreSQL, CRUD Operations, Schema Design, Indexing, Query Optimization

DevOps & Tools : Git, GitLab CI/CD, Linux, Cron Jobs, Deployment Automation

AI & Automation : LLM Integration, Prompt Engineering, Ollama, Automation Workflows

Web Scraping & Automation: Scrapy, Selenium, Web Crawling, Data Extraction, Browser Automation

Cloud & Platforms : Google Cloud Platform (Compute Engine, Cloud Storage)

OS: Linux, Windows

Professional Experience

Software Developer

Demos Foundation | Aug 2024 – Present

Tech Stack: Python, Scrapy, Selenium, FastAPI, MongoDB, PostgreSQL, Linux, GitLab CI/CD, Ollama

- **Developed scalable web scraping and automation solutions using Scrapy and Selenium** to collect, process, and integrate structured data into enterprise workflows.
- **Built and maintained Linux-based automation systems** using cron, implementing secure MongoDB backup, remote transfer, and disaster recovery workflows to improve data reliability.
- **Integrated Ollama and external LLM APIs into production workflows**, applying prompt engineering techniques for automated text classification, information extraction, deep analysis, and report generation.
- **Enhanced software delivery processes** through GitLab CI/CD pipelines, structured Git workflows, code reviews, and deployment automation, improving development efficiency and release quality.
- **Developed automation utilities** for file processing, text parsing, API integrations, and operational monitoring across enterprise applications.
- **Collaborated on backend systems** leveraging MongoDB and PostgreSQL for scalable data storage, retrieval, and workflow automation.
- Developed robust XPath and CSS selector strategies for **Selenium and Scrapy-based web scraping**, enabling reliable extraction of structured data from dynamic and complex web applications.

Projects

iPhone Data Analysis : [link](#)

Tech Stack : Python, Pandas, Data Visualization

- Built a data analysis application to evaluate iPhone models based on specifications and pricing Implemented data cleaning feature engineering and custom filtering logic to support decision making

My eVillage Portal : [link](#)

Tech Stack : Python, Django, HTML, CSS, JS

- Developed a community driven portal connecting rural users through a centralized digital platform Designed backend modules database models and reusable components for content publishing and management

Education

B.Tech – Artificial Intelligence (Honors in Data Science)

G. H. Rasoni College of Engineering & Management, Pune, **2020 – 2024**

CGPA: 8.75 / 10 | HSC (Class XII): 81.69% | SSC (Class X): 81.40%

ACADEMIC & LEADERSHIP

- Honors Specialization in Data Science & Analytics
- Completed Level 3: Presentation Mastery Program - [Toastmaster International](#)

CERTIFICATIONS

- NPTEL – Joy of Computing Using Python (Elite): [link](#)
- Google Cloud Skills Boost Learning Path: [link](#)
