Software and AI Engineer with 1.8+ years of experience building **Python backend systems, REST APIs through FAST API**, and automation workflows. Skilled in **Linux**-based development, database design with **MongoDB and PostgreSQL**, and scalable system architecture. Experienced in **integrating LLMs** into enterprise applications for **automation, text analysis, and intelligent reporting**.

Technical Skills

Programming Languages : Python, SQL, Shell Scripting

Software Engineering: Modular Code Design, Data Structures, FAST API, REST APIs, Error Handling, Logging, Scheduling

Databases : MongoDB, PostgreSQL, CRUD Operations, Schema Design, Indexing, Query Optimization

DevOps & Tools : Git, GitLab CI/CD, Linux, Cron Jobs, Deployment Automation

AI & Automation : LLM Integration, Prompt Engineering, Ollama, Automation Workflows

Libraries/Tools: Pandas, Selenium, Scrapy

Cloud & Platforms : Google Cloud Platform (Compute Engine, Cloud Storage)

OS: Linux, Windows

Professional Experience

Software Developer

Demos Foundation | Aug 2024 – Present

Tech Stack: Python, Selenium, Scrapy, MongoDB, Postgres, GitLab CI/CD, Linux, Cron, LLM, Ollama

- Developed Python-based backend services and automation tools to support scalable enterprise workflows and data-processing tasks.
- Designed and managed scheduled job systems using cron on Linux for fully automated daily operations.
- Built automation utilities for file processing text parsing API integrations and system health monitoring.
- Implemented automated MongoDB backup and restoration on Linux using cron jobs, securely transferring backups to a remote machine for disaster recovery.
- Integrated LLM based services using Ollama and external LLM APIs for automated text enrichment classification and analysis.
- Applied prompt engineering techniques for report generation deep analysis and content enrichment tasks.
- Improved development workflows using GitLab CI CD pipelines code reviews branching strategies and automated deployments.
- Documented system workflows scripts behaviors and fixes to support long term maintainability and scalability.

Projects

iPhone Data Analysis : [link](#)

Tech Stack : Python, Pandas, Data Visualization

- Built a data analysis application to evaluate iPhone models based on specifications and pricing Implemented data cleaning feature engineering and custom filtering logic to support decision making

My eVillage Portal : [link](#)

Tech Stack : Python, Django, HTML, CSS, JS

- Developed a community driven portal connecting rural users through a centralized digital platform Designed backend modules database models and reusable components for content publishing and management

Education

B.Tech – Artificial Intelligence (Honors in Data Science)

G. H. Raisoni College of Engineering & Management, Pune, **2020 – 2024**

CGPA: 8.75 / 10 | HSC (Class XII): 81.69% | SSC (Class X): 81.40%

ACADEMIC & LEADERSHIP

- Honors Specialization in Data Science & Analytics
- Completed Level 3: Presentation Mastery Program - [Toastmaster International](#)

CERTIFICATIONS

- NPTEL – Joy of Computing Using Python (Elite): [link](#)
- Google Cloud Skills Boost Learning Path: [link](#)
